Knowing what to bring to wedding dress fitting can take all the stress out of the experience

Your wedding day lingerie

Be sure to bring everything from panties, bras and shape wear. If you are wearing crinoline be sure to bring that too. All of these items will affect the shape of your dress.

Your wedding day shoes

The height of your shoes will determine whether your dress needs to be hemmed or let down and how much. So bring the shoes you will be walking down the aisle in.

Your headpiece and jewelry

If you want to wear a necklace make sure it falls where you want in relation to the neckline of your dress. Make sure your veil and gown overlap where you imagined it would.

Plenty of time

Wedding dress fittings usually involve three trips to our wedding alteration specialist. The first fitting will determine what types of alterations your dress will need. Do you need it taken in, hemmed or a bustle added. You and our seamstress will work together to decide. The second fitting will make sure that all those changes are exactly as you envisioned. This is the time you and our seamstress decide if your dress needs anymore small tweaks to make your dress perfect. The third time is to get a final vision of your dress and now you are ready for your big day.

Our expert wedding dress department will help you create the perfect vision for your important day.
